Class 10 (GPA: 9.416/10)

• School-Sports Captain, Commercial Applications School Board Topper

EXPERIENCE

Market Risk Analyst Intern, Deutsche Bank

Jul '25 - Dec '25

Global Emerging Markets

- Supported global Market Risk stress testing across CEEMEA, APAC & LatAm regions, running PV01/CS01 sensitivity and correlation stress tests for portfolio risk.
- Partnered with MRMs and traders to analyze Credit, FX, and Rates exposures, conducting breach analysis and day-on-day change tracking to identify key risk drivers.
- Escalated detailed loss analysis to Market Risk Managers for breaches exceeding €3M across Asia, CEEMEA, and LatAm desks.
- Automated risk dashboards and BAU reporting using Python, Excel VBA, and Tableau, reducing manual effort by 50% including VaR regulatory reports, stress-test macros, and dashboard rebuilds.

Birla Institute of Technology & Science(BITS), Pilani

Aug '23 -Mar '24

Strategic Consultant for SEF (Simple Education Foundation), 180 Degrees Consulting

- Developed a comprehensive data repository for prioritised districts in Punjab, enabling data-driven decision making and strategic planning.
- Designed and implemented a district intervention program based on data insights, ensuring sustainability, and alignment with local needs.

PROJECT HIGHLIGHTS

Credit Risk Analysis For SME Index Companies

Mar '25

- Evaluating the impact of Repo rate changes on default probabilities of SME Index companies.
- Imported Company Data from BMC and estimated VAR using the Historical Simulation Model, with NumPy, Pandas and Matplotlib, applying results to calculate POD, LGD and EAD.

Beta Estimation via CAPM & Equity Returns Analysis Using 4 Models

Oct '24

- Analysed and compared stock returns for 5 companies using CAPM, ARIMA, GARCH, and EGARCH models to predict future performance.
- Performed Value at Risk (VaR) analysis on a portfolio of these 5 companies with Confidence Level of 95%.

Portfolio Optimisation (Modern Portfolio Theory)

Sep '24

- Applied Markowitz Portfolio Theory to construct Minimum Variance and Tangency Portfolios using 7 securities and a cryptocurrency.
- Extensive usage of Python to finally derive an Efficient Frontier in accordance to the tabulated data

Quantification of Financial Ratios and it's influence on Profitability

Sep '23

- Used the Bloomberg terminal to analyze financial ratios and conducted a comparative analysis of the allotted companies to draw economic inferences.
- Assessed company performance based on these ratios and examined the yield curves of three countries, providing a comprehensive explanation of their shapes.

SKILLS

- Programming:** Python, R, C, HTML, CSS, LaTeX
- Other technologies:** Microsoft Excel, Tableau, Rstudio, Bloomberg Terminal, MATLAB

LEADERSHIP AND HONORS

Assistant Pitching Coordinator, Placement Unit

Aug '24 - May '25

Maximising career prospects of students by engaging in industrial collaborations with highly reputed firms. Inaugurated healthy corporate relationships with 7+ companies ensuring mutual benefit.

Practice School Coordinator, Practice School Division

Jan '25 - July '25

Leading a foundation cohort that ensures complete transparency and helps provide students their preferred industrial opportunities.
